

Universal pipe freezer for repairs on unemptied pipes with carbon dioxide coolant, for pipes Ø 1/8"-2", 10-60 mm.

- No emptying, no filling, no venting. Saves time and money.
- Coolant carbon dioxide: Fast freezing time (e.g. 3/4" in only 5 min) by up to -79° cooling performance. Non-flammable, non-toxic, universally available.
- Very narrow, indestructible freezing sleeves.
- Snug-fit freezing sleeves and feeding of the coolant directly to the pipe guarantee extremely short freezing times and economical use of coolant.
- Ergonomically designed plastic handles.
- Indestructible injector (injection nozzle) made of brass. Fast, secure connection to freezing sleeves. No setting, the right quantity of coolant is always dosed automatically.
