

ROLLER'S saw blades

Saw blades for free hand sawing of different materials, for all ROLLER'S reciprocating saws and other makes.

-  Corrugated teeth for smooth cut with low tooth pitch.
-  Straight-set teeth for aggressive cut with coarse tooth pitch.
-  Straight teeth for saw blades with very wide carbide teeth.
-  Carbide-granulate for materials that are difficult to cut.

- Alternating tooth pitch (combi-teeth) for fast, smooth cut, also when sawing mixed materials (wood/metal).
- Flexible saw blades, also for sawing flush with wall.
